BAS ACOUSTIC

Lava Acoustic Pane

Lava Acoustic Panels let you create beautiful surfaces with unique organic patterns

Volcanic lava stone transformed into panels for walls and ceilings
Be creative! The different sizes, shapes and patterns allow you to design your own unique room. Only your imagination is the limit.
We bring your design to life while giving you fabulous sound.

Organic shapes and unique patterns
Our basalt fibers extracted from volcanic lava stones make a durable and bespoke material for acoustic panels. The natural shapes and patterns are hand-made .

Absorbent made from recycled plastic
Behind the sound transparent canvas is placed a class A recyclable acoustic absorbent.

Designed according to your wishes

- Beautiful quality stone panels available in two organic-shaped patterns.
- Choose your own background textile in a huge variety of colours.
- Two different patterns inspired by natural, organic shapes + it's possible to create a custom pattern
